EDUCATION

University of Education, Lahore Pakistan

Bachelor's in Computer Science

CGPA: 3.19

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, C/C++, C#, Python
- **Frontend Development:** HTML, CSS, React.js, Next.js, Context API, Redux, Redux Toolkit, Tailwind CSS, Bootstrap, Material-UI, Shadcn, Redux Query
- **Backend Development:** Node.js, Express.js, .Net, Asp.net, REST APIs, Redis, OAuth, JWT, Authentication
- **Databases/OS:** MongoDB, Ms SQL Server, MySQL, Linux (Basic), Windows, MacOS
- **Cloud & DevOps:** AWS, Docker, CI/CD, Amazon S3, Ec2, Azure, AWS Lambda
- **Soft Skills:** Critical Thinking, Problem-Solving, Effective Communication, Team Collaboration
- **Competitions:** ICPC Regional Qualifier 2025-26 – Prelims All Pakistan **Rank 64**.

WORK EXPERIENCE

AI Reasoning Engineer | Turing

Oct 2025 – Jan 2026

- Trained and evaluated AI reasoning models using advanced competitive programming techniques and optimized C++ solutions.
- Designed and implemented algorithmic challenges that strengthened the model's logical reasoning, optimization strategies, and problem-solving depth.
- Analyzed model outputs to identify reasoning gaps and developed targeted C++ tasks to improve accuracy, robustness, and generalization.
- Utilized Docker-based environments to reliably run, test, and evaluate model training pipelines across consistent setups.
- Optimized C++ implementations with a focus on time – space complexity, exposing models to realistic computational constraints.
- Collaborated with AI research teams to refine evaluation metrics, improve data quality, and support continuous model improvement.

Associate Software Engineer | Maima Soft

Sep 2024 – Oct 2025

- Led full-stack development of enterprise-grade applications using React, .NET Core, and MS SQL Server, improving client operational efficiency by 30% through streamlined workflows.
- Reduced API response time by 40% by optimizing Entity Framework Core queries and implementing caching strategies in ASP.NET Core.
- Successfully built features for managing Distributors, Companies, Stock, Sales, Expenses, Ledger, Sales Reports, and Custom Reports.
- Designed a reusable PDF report generator using React-to-PDF, cutting report generation time from 10 minutes to 30 seconds for 10k+ records.
- Collaborated with cross-functional teams to understand core requirements of client and work accordingly reduced time of development.

OPEN SOURCE EXPERIENCE

Apache Beam

- Merged PR adding **take (n) convenience** method to **PCollection** in the Apache Beam Python SDK
- Merged PR implementing **exception chaining (raise ... from)** across the Beam Python codebase for better error tracing
- Opened PR adding foundational **UnboundedSource** API for the Beam Python SDK, backed by Splittable DoFn execution model
- Opened PR fixing **IndexError in apache_beam.utils.processes** when pip subprocess fails with short commands

- Proposed native **Watch PTransform** for periodic polling with configurable intervals, deduplication, and termination conditions

Metacall

- Submitted **PR #650 adding FreeBSD OS detection and pkg-based installation** for all major loaders (Python, Ruby, Node.js, Java, Go, Rust, COBOL) in `metacall-environment.sh`
- Extended **PORTABILITY_PATH_SEPARATOR** macro in `portability_path.h` to support FreeBSD, NetBSD, and DragonFly BSD
- Created GitHub Actions CI pipeline (`freebsd-test.yml`) using `vmactions/freebsd-vm@v1` for automated debug/release builds on FreeBSD 14.3
- Proposed cross-platform build support for **Windows MinGW, Cygwin, and Android NDK** with CMake tool-chain configurations
- Designed environment setup flow and **CI architecture covering 6 platforms**: Linux, macOS, FreeBSD, MinGW, Cygwin, and Android

PROJECTS

E-SHOP | [LINK](#)

- Built a cloud-ready multi-vendor marketplace enabling sellers to manage shops, products, orders, coupons, and events with role-based access control.
- Developed a responsive React SPA using Vite, Redux, and Tailwind CSS for fast performance and modern UI/UX across devices.
- Implemented a scalable Node.js & Express REST API with MongoDB Atlas for secure user management, product catalogs, and order processing.
- Integrated real-time buyer–seller messaging using Socket.io to enable instant communication and improve user engagement.
- Designed an admin dashboard with analytics and controls for managing users, shops, orders, and withdrawals.
- Deployed the full stack on Vercel with cloud storage/CDN, ensuring high availability, zero-downtime scalability, and production-ready performance.

HISAABER ACCOUNTS | [LINK](#)

- Full-Stack Development: Engineered an enterprise Accounts Management Software using React, ASP.NET Core, and Ant Design, serving users with a 95% user satisfaction rate for its intuitive interface.
- Workflow Automation: Streamlined financial operations by implementing 12+ modules (Sales, Purchases, Inventory, Ledger) with Entity Framework Core, reducing manual data entry time by 40%.
- Scalable Reporting: Built a custom PDF report generator using React-to-PDF, cutting report generation time from 10 minutes to 30 seconds for 10,000+ transactions.
- Cross-Functional Collaboration: Integrated RBAC (Role-Based Access Control) for Customer/Supplier Management, enhancing data security and compliance.
- Performance Optimization: Reduced API latency by 30% through query optimization in MS SQL Server, improving real-time stock tracking accuracy.

HISABER PHARMA | [LINK](#)

- Engineered a full-stack Pharmacy Management System using React (frontend) and ASP.NET Core (backend), delivering end-to-end solutions for inventory, sales, and financial operations.
 - Integrated Bootstrap 5 to create a modern, responsive UI/UX, optimizing accessibility across desktop and mobile devices.
 - Designed scalable modules for Distributor/Supplier Management, Inventory Tracking, Sales Analytics, Expense Tracking and Financial Ledgers improving cross-departmental workflows.
 - Developed custom PDF report generation tools for sales, inventory, and financial data, reducing manual processes by 30%.
 - Implemented role-based access control (RBAC) and audit trails to ensure compliance with HIPAA and data integrity standards.
 - Leveraged MS SQL Server for secure database architecture, optimizing query performance by 25% using stored procedures.
-

CERTIFICATES

- **Foundations of Web Development** – Udemy
 - **Google Soft Skills Program** - Google
 - **Meta Hacker Cup Participation** – Meta
 - **Introduction to Prompt Engineering** - Simplilearn
 - **Fundamentals of C#** – Udemy
 - **Object Oriented design** – Coursera
-

Societies / Extra Curriculum

- **AWS Student Builder Group Leader** – Amazon Web Services
- **Campus Ambassador** - Devsinc
- **Technical Trainer/Research Lead** – DevWeekends
